PROFESSIONAL EXPERIENCE

Software Engineering Lead – Accessibility 2019–Present Ameriprise Financial | *Minneapolis, MN*

- Lead enterprise accessibility strategy, mentoring teams and establishing governance to deliver WCAG 2.2 AA-compliant web experiences at scale.
- Implement automated accessibility testing in local development environments and CI/CD pipelines, improving detection and remediation of accessibility issues.
- Partner with developers, designers, and product teams to integrate accessibility into frontend architecture, design systems, and agile workflows.
- Founded and manage dashboards tracking organizational accessibility metrics, remediation progress, and audit performance.
- Collaborate with external vendors to identify, document, and prioritize accessibility enhancements, while driving organizational adoption of inclusive design practices.

Full Stack Developer & UX Designer 2017–2019 RESCO | *Hudson, WI*

- Designed and developed responsive websites for clients in the commercial food service industry using Ruby on Rails, React, jQuery, HTML, SASS, and CSS Grids.
- Collaborated closely with designers to translate mockups into pixel-perfect, high-performance web interfaces across mobile, tablet, and desktop.
- Delivered tailored web solutions to meet client objectives, from CMS customization (Volusion) to front-end optimization.
- Conducted research and prototyping to evaluate frameworks and emerging technologies for future projects.

Web Architecture and Framework Engineer 2015–2017 3M | *St. Paul, MN*

- Developed reusable, scalable components for IBM's internal content management system using HTML, JavaScript, SASS, and plugin-based templating.
- Collaborated within an Agile Dual Track Scrum team to prototype, test, and validate user-centered solutions.
- Built and maintained Design Pattern Libraries and authored technical documentation to support content editors and ensure design consistency.

TECHNICAL SKILLS

Accessibility & Testing

WCAG 2.2 AA compliance
